

# Lamaxa Moments

The new Lamaxa L50 View

Der SonnenLichtManager

## Lamaxa Moments

It's different when it's yours.

Spend more time outdoors and look forward to a clear view of the sunny skies or the stars – even if the weather isn't cooperating. The elegant Lamaxa L50 View patio roof always provides you with reliable protection thanks to its glass roof. It also provides cooling shade when the sun is shining, with an additional internal or external conservatory awning Climara.

Experience your own personal Lamaxa moment.

My Lamaxa Moment

*Clear views,  
unforgettable  
scenes.*

My Lamaxa L50 really earns its name "View". The glass roof doesn't only impress me, but all of my friends as well. It's simply indescribable. At night, the view up at the starry skies. And when it rains, the patter of raindrops, making you feel protected and safe.

*Lamaxa L50*  
*View*

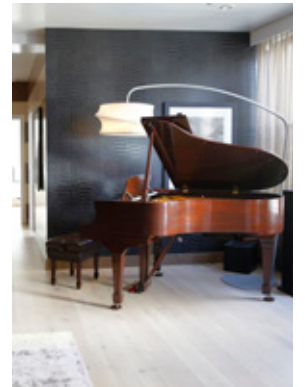

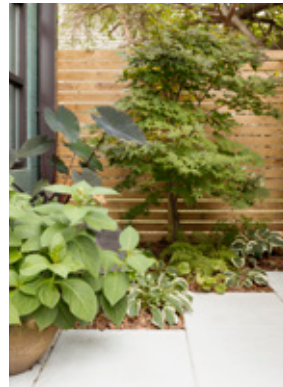

*Experience the city in  
all ways.*

What I find particularly elegant is the gentle slope of the glass between the individual rafters. This gives the cubic design even more emphasis. And when the sun shines too brightly, I simply lower the conservatory awning Climara for shade, enjoy the cooling breeze of summer air and listen to the never-ending sounds of the city.

My guests love when I entertain them under the Lamaxa glass roof. If it's windy or the low-hanging sun starts to glare – no problem: I simply lower the GranTex, as vertical shading with wind-stable easyZIP guidance, and the lively conversation at the table can continue.

*360 degree view for  
new perspectives.*

The Lamaxa equipment

# Your personal Lamaxa L50 View

Your Lamaxa L50 View, with its patio roof with elegant glass roofing, offers you maximum transparency. It shows off an attractive cubic design and, with the elegant form, integrates perfectly into your outdoor area. An additional sun shading system is also possible: You can choose between an optional internal or external conservatory awning Climara for shading. Look forward to your new favourite outdoor space.

The Lamaxa L50 View is setting new standards in equipment and personalisation options. With the WMS radio remote control, the optional awning, the lighting, the vertical shading and the radiant heater can be conveniently operated via hand-held transmitter or smartphone with WMS WebControl pro. The weather-dependent positioning of the shading, depending on weather, temperature or solar radiation, can also be fully automated.

Choose from our wide range of weather-resistant colour coatings and fabrics. Expand your Lamaxa with dimmable LED lighting, flush-mounted vertical elements such as the GranTex with easyZIP guidance, elegant glass, wooden or aluminium sliding elements or with warming Design radiant heaters.

Free-standing or with wall connection, the patio roof covers areas up to 6 metres wide and 4.5 metres long with only 2 or 4 self-supporting poles.

reddot winner 2021

1

#### Colour selection

in accordance with WAREMA Colour World, with many options to choose from and a high-grade fine texture finish, which is more resistant to external influences (dirt, scratches)

2

#### Sliding elements

wooden, aluminium and glass sliding systems can be manually moved horizontally

3

#### LED lighting

remote-controllable and dimmable, the rafters are integrated with LED strips. They optimally illuminate the area under the roof

4

#### Vertical protection with fabric

flush-mounted in the patio roof frame, up to 6 m wide, GranTex with easyZIP guidance

5

#### Glass covering

the glass covering is not included in the scope of delivery. The glass support profile is pre-equipped for 10 mm or 12 mm laminated safety glass

6

#### Weather station

gathers weather data such as wind speed, solar radiation, temperature, precipitation and enables automatic control of accessory products such as the conservatory awning Climara or the GranTex with easyZIP guidance

7

#### Water drain

integrated in freely selectable poles

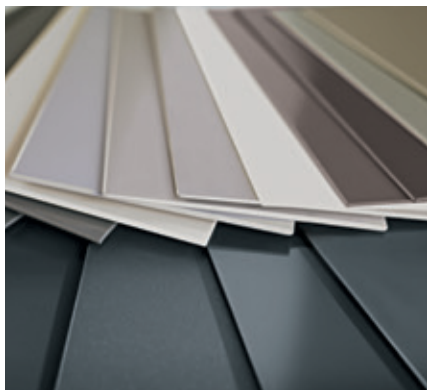

8

#### Conservatory awning Climara

an internal or external conservatory awning Climara in a cubic design provides additional protection against the sun if desired

Lamaxa L50

# The Features

## Experience exclusive Colour Worlds

The WAREMA Colour World is available for all powder-coated aluminium parts such as slats and profiles. WAREMA offers a large selection of powder colours. Choose from the three colour categories "Highlight", "Variation" or "Individual" – always including a high-grade fine texture surface.

## Control via remote control or app

The Lamaxa is operated via the WMS radio system. Upon request, it is possible to operate the Lamaxa via a smartphone, WMS WebControl pro or Amazon Alexa. This means you can conveniently control awnings, lighting, radiant heaters, and much more. Already included in the Smart Living package.

## Design options

Free-standing or with wall connection, the patio roof covers areas up to 6 metres wide and 4.5 metres long with only 2 or 4 self-supporting poles. Due to the glass dimensions, a maximum view out of up to 1 metre is possible.

## Elegant wooden and aluminium sliding shutters

Wooden (larch ecru) or aluminium lateral sliding shutters create elegant design accents. The aluminium shutters can be coated to match the frame or in a contrasting colour.

## High-grade glass sliding system

Lateral glass sliding systems (e.g. Solarlux glass sliding system SL20e) offer additional transparent protection against wind and cold while maintaining your view out.

## GranTex with easyZIP guidance

They combine modern design with functional safety. The intelligent lateral guidance guarantees exceptional stability and a firm hold even in strong winds.

A responsibility for  
nature and people.

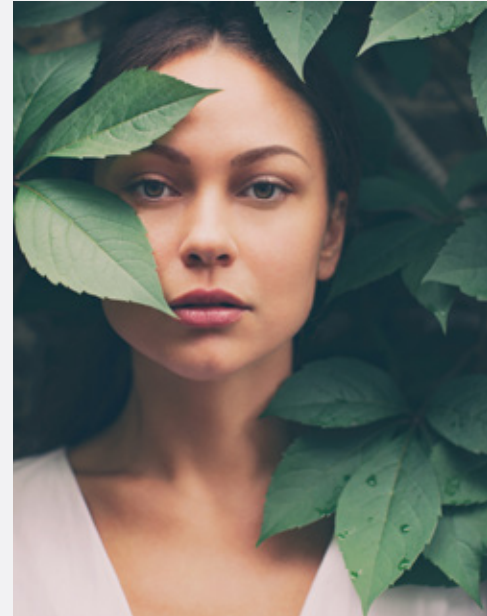

### Feel-good atmosphere with the Design radiant heater

Even if the temperature drops late in the evening, with the infrared short wave radiant heater (in a colour matching your Lamaxa) with tinted glass ceramic and a power of 2,200 Watts, you can enjoy yourself under your Lamaxa for even longer.

### Conservatory Awning Climara

Effective sun protection with internal or external conservatory awning Climara in cubic design that protects from solar radiation. Can be optionally controlled with WMS Weather station. With the Smart Living Control package including remote control.

We understand sustainability to mean holistic responsibility: ecological, economic and social. That's why we aren't just focusing on climate and environmental protection. We always keep an eye on the people who live with our products. The colleagues who work with us. The regions in which our production is based.

Since being founded in 1955, we have been creating sun shading solutions of the highest quality. which, thanks to their durability, conserve valuable resources. They help to reduce heating as well as cooling energy and thus save costs.

### LED in the rafters

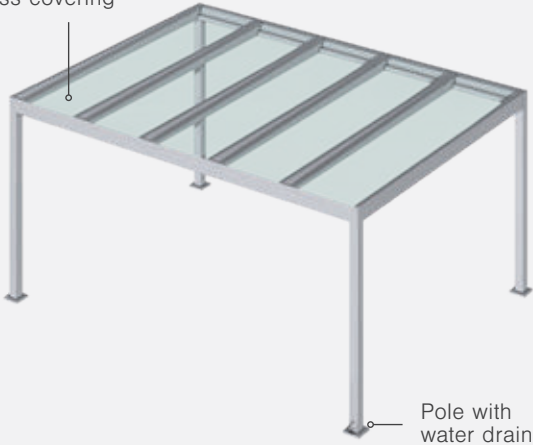

The integrated LED lighting in the rafters provides elegant and particularly evocative lighting at dusk.

# More Lamaxa solutions

Lamaxa L50

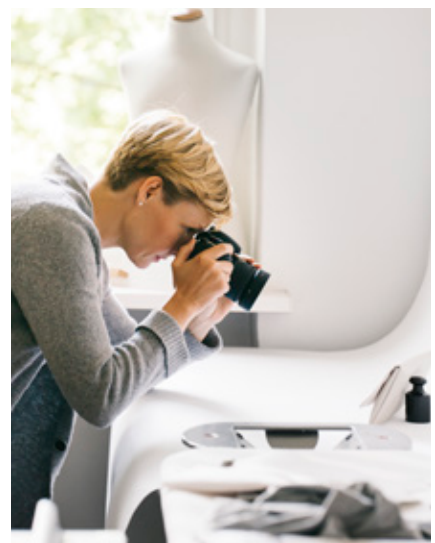

**Your elegant slat roof with controllable aluminium slats**

Your Lamaxa L50 is the slender roofing choice consisting of pivotable slats and offers you almost year-round sun shading and weather protection. The incidence of light can be regulated precisely with the pivotable slats, up to completely closing your slat roof.

Lamaxa L50 Tex

**Your design textile roof with movable sun shading product**

With the Lamaxa L50 Tex, you can choose your retractable and extendable sun shading product in different colours and designs – as a pure sun roof or as a water-resistant roof with integrated water drainage system. The textile roof is safely guided using the secudrive® guide technology.
