

WAREMA Colour World

Available for all guide rails, cover panels, profiles, boxes or frames.

Der SonnenLichtManager

The WAREMA Colour World

For all guide rails and guide profiles, cover panels, boxes and frames

Choose the perfect shade from a wide selection of attractive powder colours for powder-coated aluminium parts such as guide rails, guide profiles, cover panels, boxes or frames. The clear categories of Highlight, Variation and Individual optimise your consultation process and help you to find the right colour for the individualised sun shading system quickly and easily. Coating different than the colours of the WAREMA Colour World upon request.

Additional information such as the Colour World table with all colours can be found at www.warema.com/colour-world

Categories

Highlight

The following RAL and DB basic colours form the foundation of the WAREMA Colour World. We offer you selected standard colours, which satisfy all of the latest colour trends.

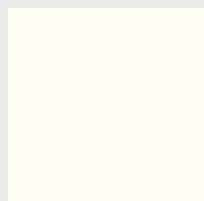

Variation

Take this opportunity to vary your design with more RAL basic colours. Any special colour concept can be realised.

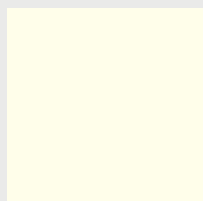

Individual

Even more additional colours complete the WAREMA Colour World and offer greater individuality. So no wishes are left unfulfilled.

RAL 7022

RAL 8014

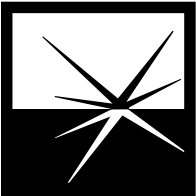

The displayed colours from the Highlight category form the basis of the WAREMA Colour World. Colour deviations are due to printing technology.

Surface qualities

The variety of surfaces and comprehensive colour selection give you the chance to make your customers' wishes a reality. Choose from five surface qualities in order to perfectly adapt the gloss level and texture to the corresponding structural condition. The exceptional coating quality ensures longevity – independently tested by the German Quality Association for the Coating of Building Materials (GSB). The surface coating with chrome-free pretreatment is compliant with the directive GSB-AL 631. The aluminium parts are delivered in "GSB Sea-Proof" as standard.

You can find more information at www.warema.com/colour-world

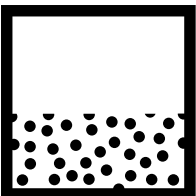

Satin finish

A satin finish leaves a slightly glossy surface with a smooth finish and optimal light and weather resistance.

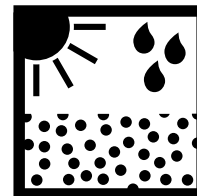

Matt

A matt surface is distinguished by its smooth matt finish and optimal light and weather resistance.

Fine texture

The fine texture surface quality has impressive effects, as characterised by the optimal light and weather resistance of the surface.

Highly weather-resistant matt and fine texture

The highly weather-resistant surfaces in matt or fine texture are characterised by significantly improved weathering behaviour in terms of gloss retention, weathering, chalking and colour stability.
