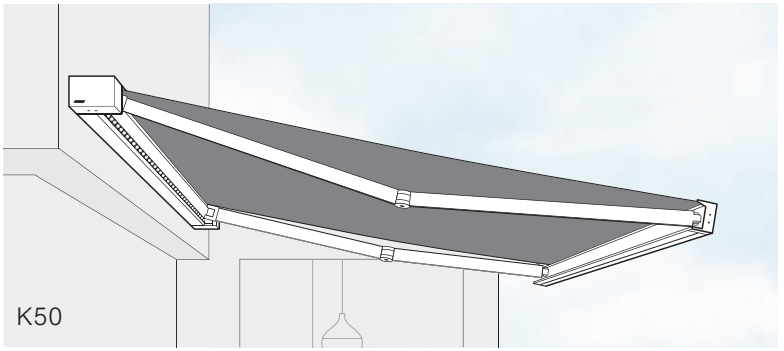
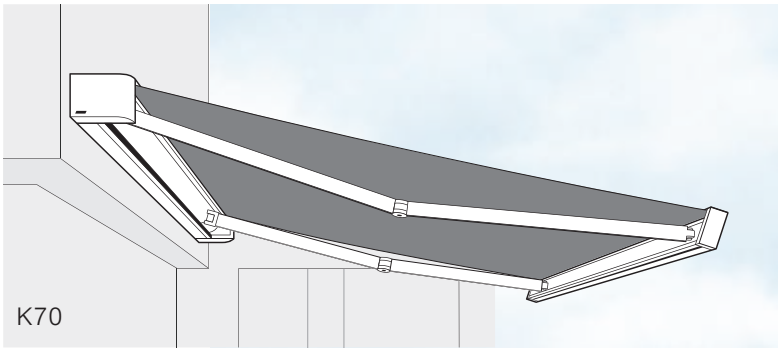
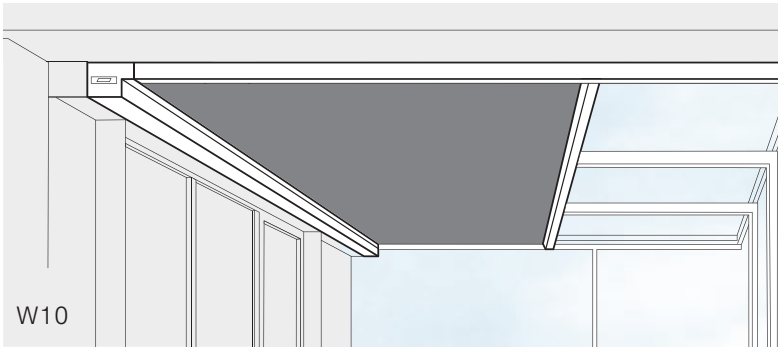
WAREMA Cubic Line

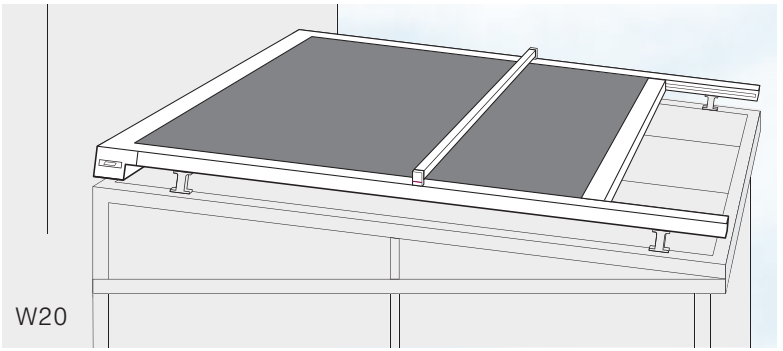
Perfect aesthetics

P20









For your own unique architecture

Cubic design is more than just a trend. It is a timeless architectural and design language marked by its clarity and angular, accentuated lines. Set aesthetic standards with our new Cubic Line awnings.

Choose from selected awnings in an exclusive angular design, including our new pergola awning Perea P20 with angular cover and elegant pole attachment.

The high-grade cassette awning Terrea K50 and K70, the internal conservatory awning Climara W10 and the external conservatory awning Climara W20 are also available in a cubic look.

Pergola awning Perea P20
The modern shading solution combining an extremely slender appearance with a robust construction.

Cassette awning Terrea K50
The compact cassette awning for flexible use on patios and balconies.

Cassette awning Terrea K70
The comfortable cassette awning for shading large areas with a variety of extras.

Conservatory awning Climara W10
The internal awning with innovative blind guidance system and many equipment models.

Conservatory awning Climara W20
The external awning for shading both large and small glass surfaces with maximum wind stability.

Pergola awning

Perea P20

Enjoy southern flair in a modern ambience. The pergola awning is equipped with an angular cover, elegant pole attachments and a fixed or travelling reinforcement profile in a cubic design.

Slender

Thanks to the slim design, the pergola awning looks particularly slender and enhances the appearance of your patio.

Cubic

Thought-out down to the last detail. The square design blends harmoniously into the clear lines of your architecture.

Highly robust

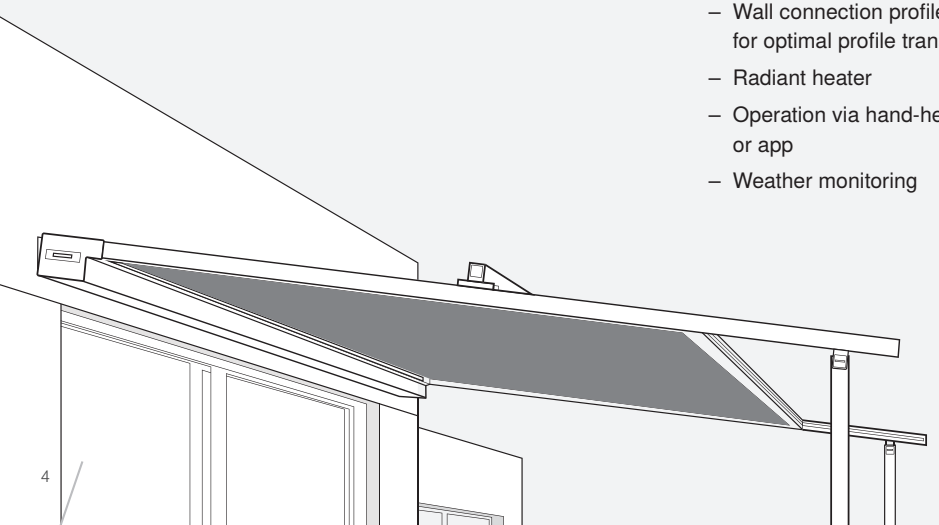
Enjoy the perfect combination of elegance and function: With secudrive® technology, your awning fabric runs tightly and securely on the rail - a fixed or travelling reinforcement profile additionally tensions the fabric.

(Key) features

- Max. width 650 cm
- Max. projection 600 cm
- Max. area 30 m^2
- Reinforcement profile, travelling or fixed
- With electric drive
- Powder coating as per WAREMA Colour World
- Outstanding fabric tension thanks to secudrive® guidance
- No incidence of light between fabric and guide rail

Brilliant extras

- LED strip lighting
- Wall connection profile with rain hood for optimal profile transitioning
- Radiant heater
- Operation via hand-held transmitter or app
- Weather monitoring



Cassette awning

Terrea K50

Look forward to an elegant awning that retracts into a protective cassette. Stylish, modern cubic design – compact, robust construction. You can choose from numerous awning fabric designs from the WAREMA collection.

Discreet

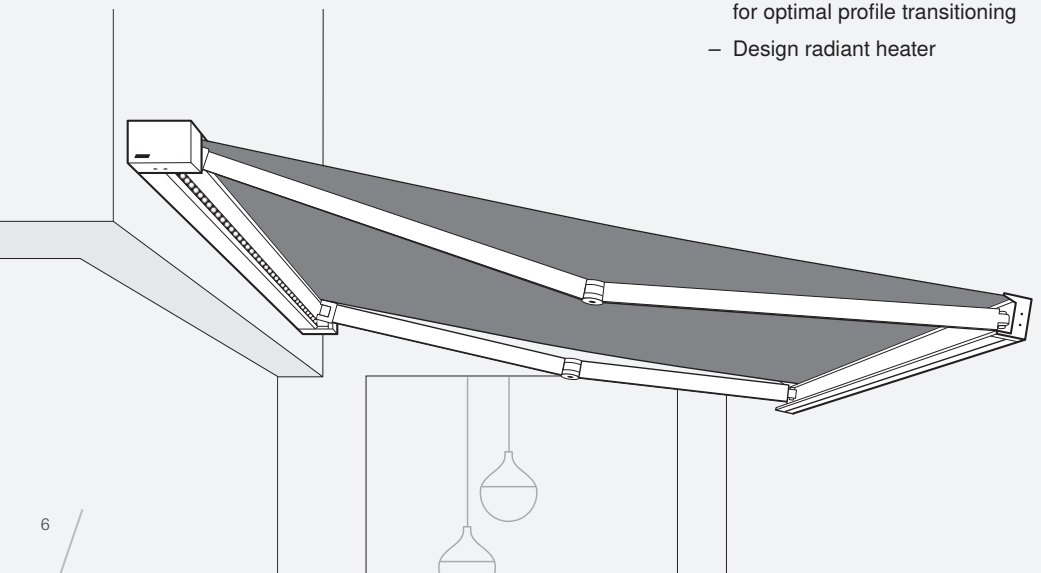
Thanks to the particularly small mounting distance to the wall and ceiling, the awning fits unobtrusively onto your facade.

Durable

The cassette optimally protects the fabric and articulated arms of your Terrea. The robust construction also guarantees a secure hold.

Aesthetic

Enjoy premier design, honoured with the Red Dot Design Award.



(Key) features

- Max. width 500 cm
- Max. projection 300 cm
- With crank or electric drive
- Powder coating in RAL 9016, RAL 9006 or W4916

Brilliant extras

- WMS Wind sensor
- Integrated LED strips in the cassette, dimmable
- Valance roller blind with crank
- Operation via hand-held transmitter or app
- Wall connection profile with rain hood for optimal profile transitioning
- Design radiant heater

Cassette awning

Terrea K70

You will love this large awning from the Cubic Line range. Combining comfort with the perfect design, it is the ideal solution for cubic architectures with flat or mono-pitch roofs. The high-grade awning fabric and articulated arms are safely retracted into the protective cassette.

Aesthetic

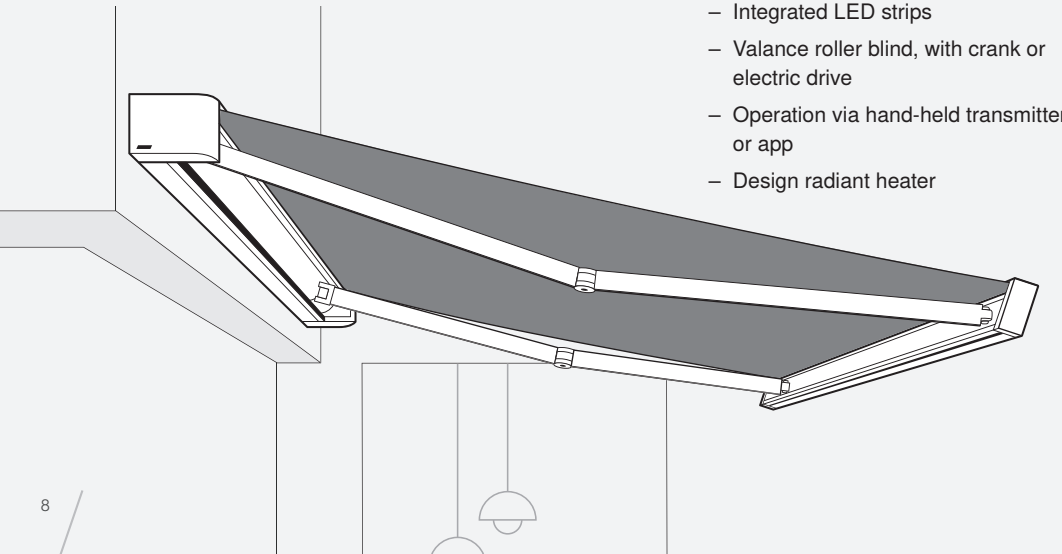
Look forward to the award-winning design of the iF product design award winner: the modern, rectangular shape of the cassette is an absolute showstopper.

Expansive

Your Terrea K70 is a generous shade provider, ideal for shading large areas.

Durable

The cassette protects the fabric and articulated arms of your Terrea. The robust construction also guarantees a secure hold.



(Key) features

- Max. width 700 cm
- Max. projection 400 cm
- Max. inclination angle adjustment 35°
- With electric drive
- Powder coating as per WAREMA Colour World
- Group units connect several awnings with just one single drive

Brilliant extras

- Integrated WMS Comfort control
- WMS Wind sensor
- Wall connection profile with rain hood for optimal profile transitioning
- Integrated LED strips
- Valance roller blind, with crank or electric drive
- Operation via hand-held transmitter or app
- Design radiant heater

Conservatory awnings

Climara W10

The internal awning in cubic design for your conservatory.
With optimum sun shading thanks to the secudrive® guidance technology – shading without a light gap between the awning fabric and guide rail.

Perfect

Enjoy extraordinary sun shading without lateral incidence of light with secudrive® technology. The fabric is guided in a rail so that there are no gaps between fabric and guide rail.

Slender

The flat and compact design lends the awning a light and airy appearance that integrates ideally into your conservatory.

Individual

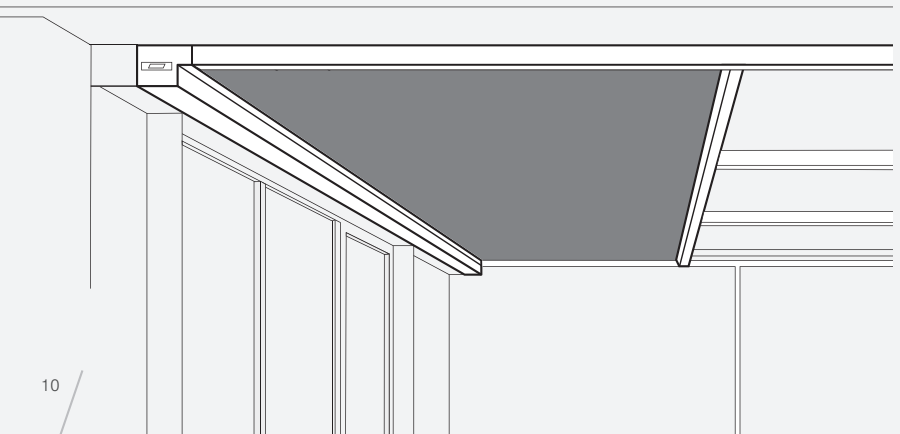
Create even more individuality with the integrated LED strips or the optional valance roller blind as protection against low sun.

(Key) features

- Max. width 650 cm
- Max. projection 600 cm
- Max. area 30 m²
- With electric drive
- Flat and compact design
- Versatile sun shading in or under glass

Brilliant extras

- Operation via hand-held transmitter or app
- Valance roller blind operable via radio or crank
- LED lighting in the guide rail
- Direction of movement "from bottom to top" also possible



Conservatory awnings

Climara W20

With the external conservatory awning Climara W20 you can effectively keep the heat out during summer. It impresses through the straight-lined cubic design, optimal shading and wind-stable secudrive® guide and its versatile application possibilities on many glass surfaces.

Wind-stable

Stay relaxed even in windy weather thanks to a spring steel strip attached to the blind of your awning that runs tautly in the guide rail. A reinforcement profile additionally tensions your awning fabric.

Perfect

Enjoy extraordinary sun shading without a light gap with secudrive® technology. The fabric is guided in a rail so that there are no light gaps between it and the guide rail, and the fabric is optimally tensioned.

Smart

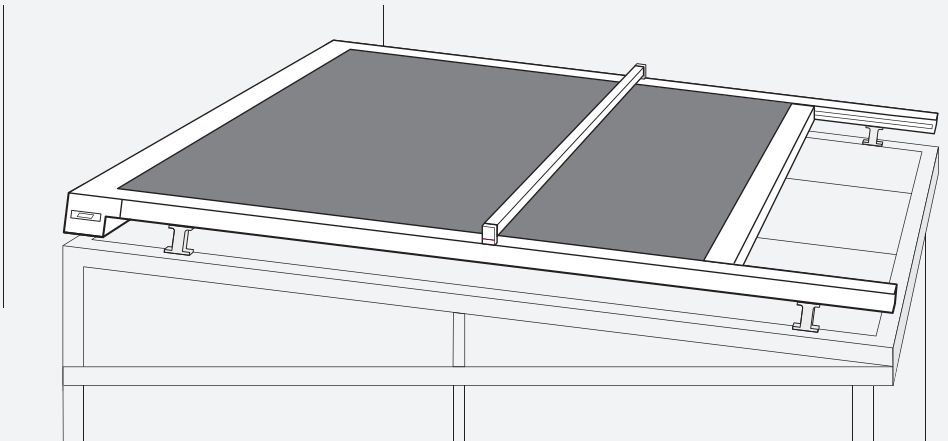
The WMS sensor system, lying flat on the guide rail, takes care of all the settings for you. A sensor measures wind, brightness and precipitation so that your awning automatically retracts or extends depending on the weather.

(Key) features

- Max. width 650 cm
- Max. projection 600 cm
- Max. area 30 m²
- With electric drive
- Flat and compact design
- Outstanding fabric tension thanks to secudrive® guidance
- No incidence of light between fabric and guide rail
- High wind stability

Brilliant extras

- Direction of movement "from bottom to top" also possible
- WMS sensor system incl. integrated weather station



WAREMA Cubic Line

The features make all the difference

Elegant housing cover

The elegant cover panels are in the modern Cubic Line design, underline the trend towards clear, angular shapes and are ideally suited to modern cubic architecture.
