Weather-protection solutions for outdoor dining

**Der SonnenLichtManager**

Lamaxa L50, Star unit

## Outside is the new inside **Trendsetter for outdoor dining**

An inviting ambience, fresh air and a very special hospitable atmosphere - outdoor dining offers an experience that is attracting more and more guests. Expand your hospitality area and enhance your added value in a profitable way.

Attract guests with a winning style outdoors. This means an inviting design, but also maximum comfort as well as reliable and attractive weather protection. Create the perfect solution with WAREMA. Precisely tailored to the needs of your customers and your spatial potentials.

Whether it's protection against sun, rain or wind - solutions from WAREMA allow you to create feel-good places outdoors. In addition, there are many extras that pay off for your food service industry. For example, prepare an unforgettable evening for your visitors with Design radiant heaters and dimmable LED lighting and extend your outdoor season.

From pergola awnings to patio awnings, sun sails and professional parasols to modular roof systems - WAREMA offers you everything to make your guests feel comfortable from a single source.

People love to spend their time outdoors. And even more so when we add good food and swanky drinks. Hans-Wilhelm Renkhoff had recognised this early on when he founded WAREMA in 1955. Today, we are a leading provider of sophisticated SunLight Management. Whether innovative sun shading products and weather protection products or intelligent control systems: our sustainable solutions create a real feel-good climate and ensure a plus in quality of life - especially when it comes to hospitality.

Precision – from planning all the way through to implementation

## Our benchmark for modern hospitality

**With sophisticated, custom-fit complete solutions and overall concepts, WAREMA, together with CARAVITA, creates an attractive and lucrative extension for your outdoor hospitality area. Individual designs – even for special requirements – are realised and supported by reliable service.**

The installation of high-grade sun and weather protection for the outdoor area optimally protects your guests from the effects of weather like sun, wind and rain, extending the outdoor season at restaurants, hotels, pubs, beer gardens or cafes.

Yet with a high-grade and highly durable WAREMA sun and weather protection, you get much more:

- + You generate more revenue through additional business whatever the weather
- + You design your outdoor area in an appealing and value-enhancing way as an eye-catcher for potential guests
- + You receive comprehensive advice and individual planning as desired for your project
- + Our broad product range guarantees you the optimal solution for your catering business and makes for a pleasant stay and more satisfied guests
- + Our wide range of colours and fabric prints ensure a perfect match with the surroundings and allow you to customise your design
- + Enjoy tested and excellent quality - made in Germany

# Pergola awnings Perea

# Heavenly atmosphere

## Perea P70

Your guests will feel as though there was nothing between them and the sky. The pergola awning Perea P70 has innovative pleating technology and translucent fabrics which enable this unique effect. The awning is also rain-proof and offers high wind stability up to wind force 7 – for even greater outdoor living pleasure.

The Perea P70 is your fabric roofing solution at the highest level, offering great planning reliability for events at your large outdoor area thanks to its maximum wind and weather protection. The travelling profiles ensure very good fabric tensioning and hence controlled rainwater run-off. The dimmable LED seating lighting attached to the horizontal profiles provides a unique ambience – designed for dining.

Max. shading area per individual unit

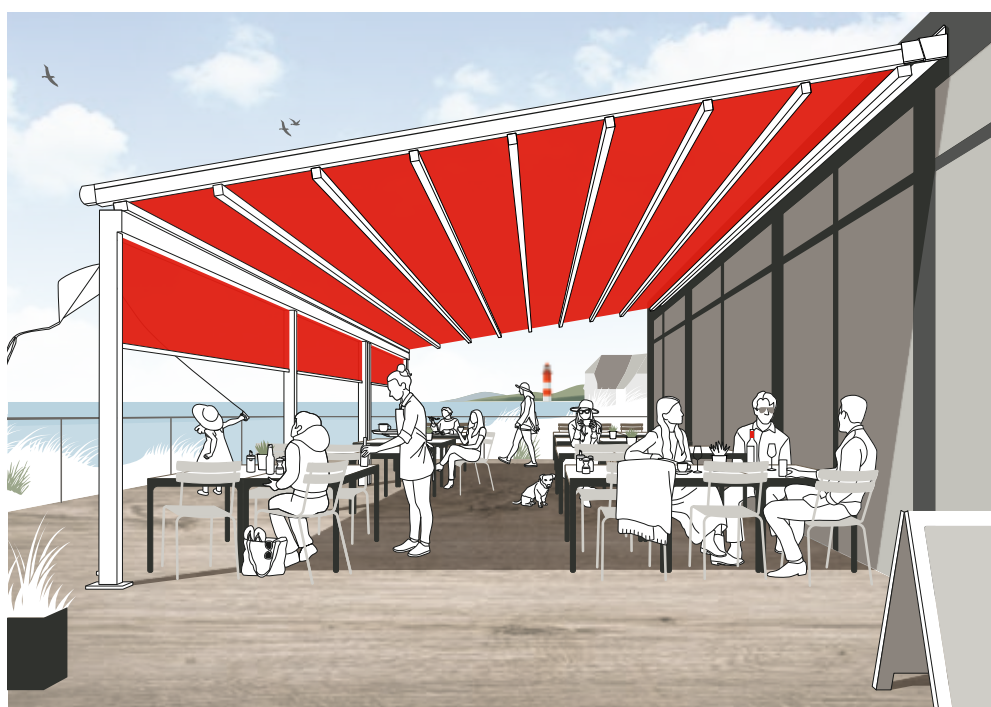

**36.00 m<sup>2</sup>**

Individual unit maximum dimensions

Width: **6.00 m**

Projection: **6.00 m**

## Installation options

- > Individual units or series-mounted units
- > Wall or free-standing patio frame installation
- > Poles installed on on-site foundation or ground screws
- > Installation possible without permanent on-site floor anchoring thanks to Multicubes

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > LED seating lighting
- > Lateral fixed frame for additional weather protection
- > Vertical awning with easyZIP guidance for additional protection from wind and sun
- > WAREMA radiant heater

## Advantages

- + High planning reliability thanks to very good wind and weather protection (wind force 7.61 km/h). Vertical patio side screens and radiant heaters for an even longer stay.
- + Dimmable LED seating lighting on the cross profiles creates an impressive ambience
- + Travelling horizontal profiles ensure very good fabric tension
- + Weatherproof and rainproof fabric for a comfortable climate and pleasant lighting under the awning
- + Controllable drainage, integrated into the pole
- + Extravagant appearance with innovative pleating technology

# Season in all kinds of weather

## Perea P60

The Perea P60 pergola awning allows your guests to enjoy the outdoor area no matter what the weather. Because this awning is your weatherproof and wind-stable solution. The rainproof fabric with incorporated drainage openings, the integrated gutter and the rainwater drainage in the pole drain away water in a controlled manner. Even when the wind blows, your guests can linger in the comfortable atmosphere of the outdoor area. The high wind stability provided by the patented secudrive® system in the guide rails and the rigid reinforcement profile make it possible. The Multicubes make installation possible even without a concrete foundation.

Max. shading area per individual unit

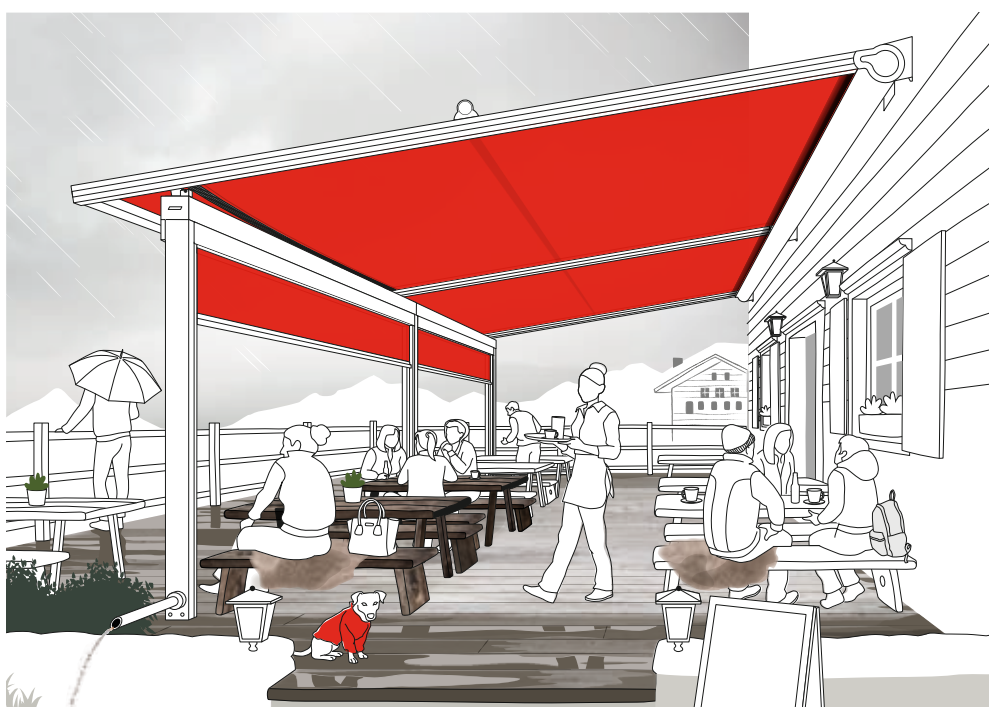

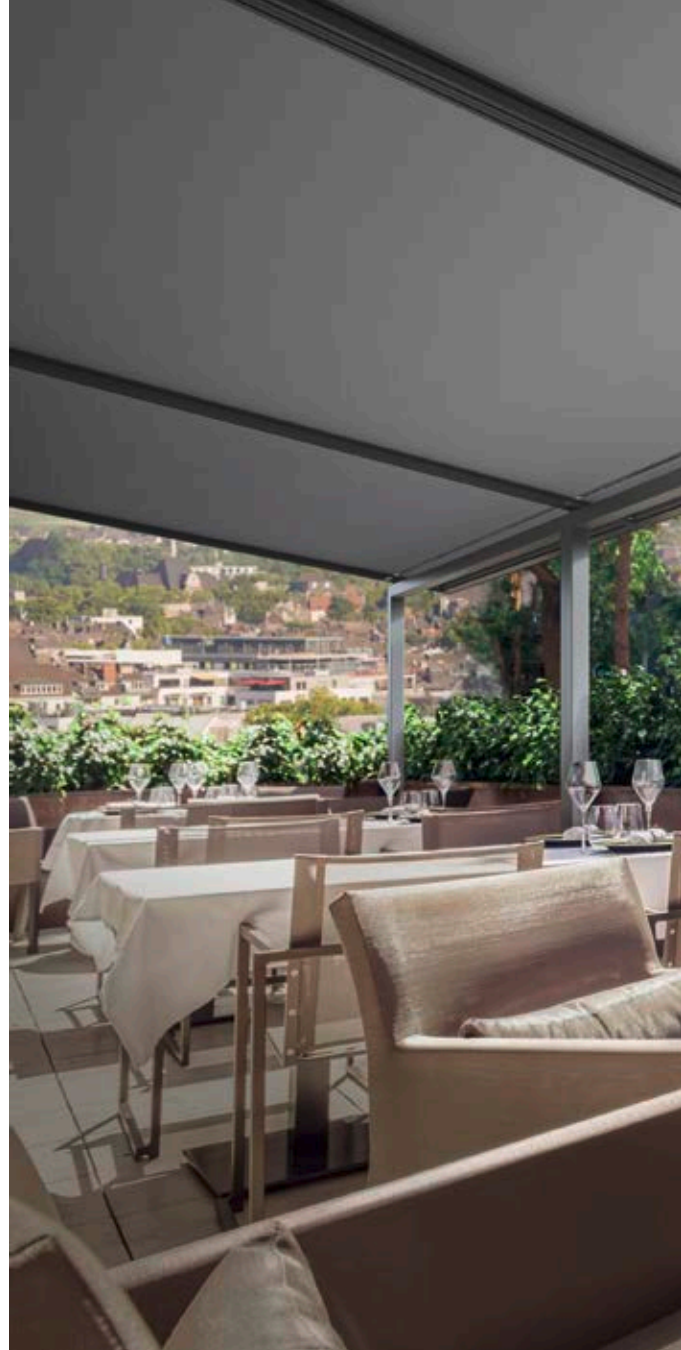

**30.00 m<sup>2</sup>**

Individual unit maximum dimensions

Width: **6.00 m**

Projection: **5.00 m**

## Installation options

- > Individual units or series-mounted units
- > Wall or free-standing patio frame installation
- > Poles installed on on-site foundation or ground screws
- > Installation possible without permanent on-site floor anchoring thanks to Multicubes

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Integrated ambient lighting or LED strip light rail
- > Lateral fixed frame for additional weather protection
- > Vertical easyZIP awnings for lateral protection against wind and sun
- > WAREMA radiant heater

## Advantages

- + The rainproof fabric with integrated PVC mesh, integrated drainage gutter and rainwater drainage in the pole drain away water in a controlled manner
- + Pergola awning for use as sun shading system and rain protection
- + WAREMA Colour collection for perfect matching with your dining environment
- + Stable construction with high wind stability (wind force 6, 48 km/h)
- + High comfort even in adverse weather thanks to all-round side protection
- + Can be dismantled in the winter months

# Top-notch hospitality

## Perea P40

With the pergola awning Perea P40, you create a wind-stable, large sun shading system for a maximum seating area as well as a Mediterranean ambience for your outdoor dining.

The Perea P40 is a unique eye-catcher with a long-distance effect that attracts guests. It consists of a high-grade textile sun shading system with poles, in which the fabric is extended on a curved or straight guide rail. The Multicubes make installation possible even without a concrete foundation. Now also available as WeatherEdition with weather-resistant fabric quality.

Max. shading area per individual unit

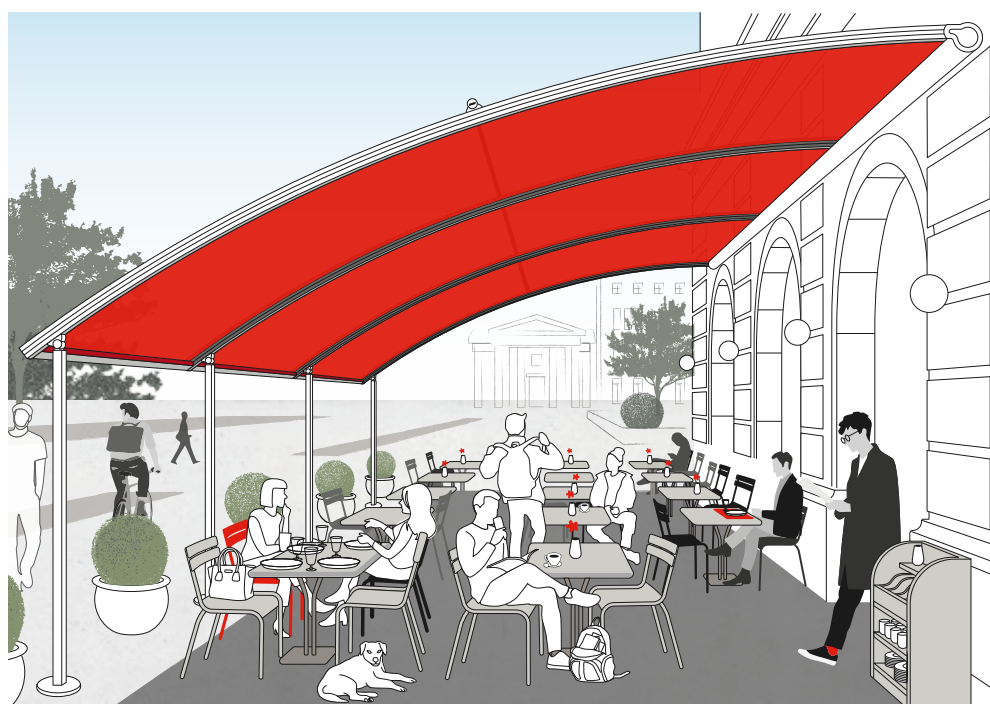

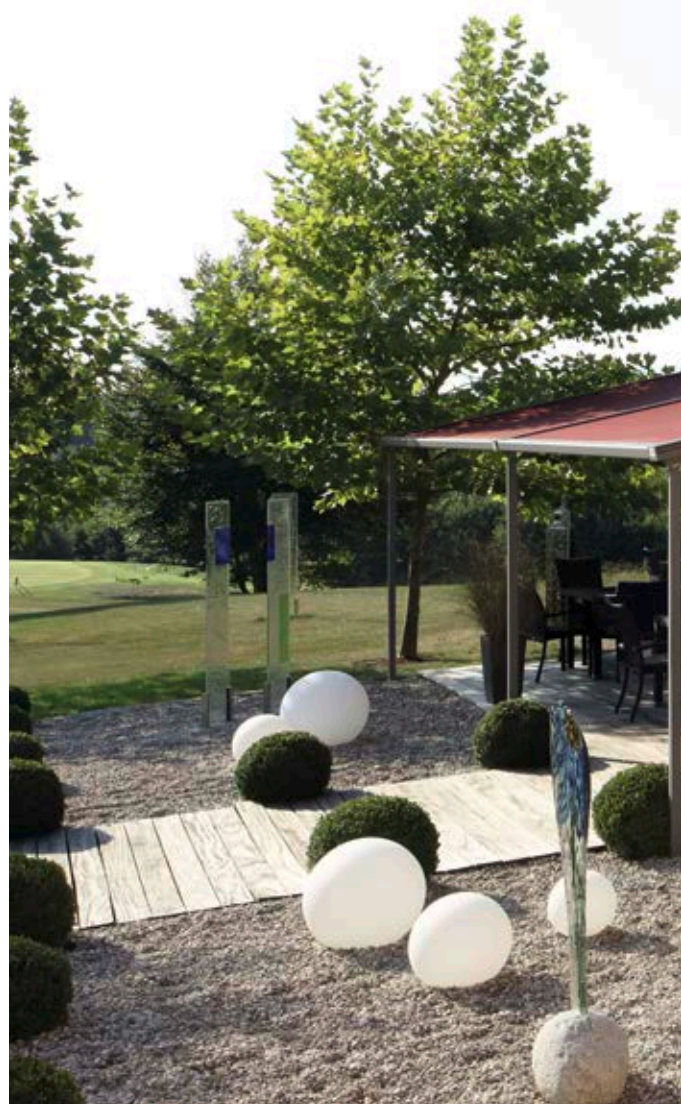

**35.00 m<sup>2</sup>**

Individual unit maximum dimensions

Width: **6.50 m**

Projection: **7.00 m**

## Installation options

- > Individual units or series-mounted units
- > Wall or free-standing patio frame mounting (max. 14 m projection)
- > Poles installed on on-site foundation or ground screws
- > Installation possible without permanent on-site floor anchoring thanks to Multicubes

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Integrated ambient lighting with LED strip light rail
- > Valance roller blind with crank or motor against a low sun
- > WAREMA radiant heater
- > P40 WeatherEdition for additional weather protection

## Advantages

- + Maximum hospitality area thanks to a fabric projection of up to 7 m
- + The P40 WeatherEdition provides additional weather protection (rain class 2) with weatherproof fabric quality and integrated drainage
- + Spacious feel-good ambience with large headroom thanks to a curved guide rail
- + Maximum flexibility for your business thanks to easy dismantling during the winter months
- + Slender, unique appearance is a special eye-catcher for your guests

Lamaxa L60, series-mounted unit

Your star ambience.

## Roof systems Lamaxes

# Maximum size and flexibility

## Lamaxa L50 series-mounted and star units

Coupled star and series-mounted units with slender poles and large shading areas offer you maximum design and seating options. The Lamaxa star system with multiple roof bays creates definable spaces for larger groups of guests. Using ZIP or sash frames, the area can be perfectly matched to the size of the group. A series-mounted unit connected to the facade expands your interior space and creates a smooth transition to the outdoors. The unit offers sun and weather protection at the press of a button through tiltable slats.

Max. shading area

Series-mounted unit: **144.00 m<sup>2</sup>**

Star unit: **972.00 m<sup>2</sup>**

Individual unit maximum dimensions

Length: **6.00 m**

Width: **4.50 m**

Lamaxa L50, Star unit

## Installation options

- > Units up to a total area of 972 m<sup>2</sup> upon request
- > Wall or free-standing installation

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Dimmable LED strips in the horizontal or vertical area, for direct and/or indirect lighting of the hospitality area
- > Lateral awnings with easyZIP guidance for additional shading and wind protection
- > Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- > Additional poles for thoroughfares and entrance areas
- > Star and series-mounted unit
- > WAREMA Design radiant heater
- > Engageable supports for individual requirements

## Advantages

- + Modular construction offers maximum seating and design options, perfectly tailored to your outdoor area
- + Elegant, slender large-area shading with maximum seating capacity and integrated LED seating lighting
- + Additional year-round hospitality area thanks to lateral sash frames and radiant heaters
- + Flexible potential uses for events and functions as well
- + Individual shading of individual areas

# The ultimate feeling of freedom

## Lamaxa L70

With the slat roof Lamaxa 70, you not only create a stylish ambience with cubic design, you also create an unmatched feeling of freedom. With the Lamaxa L70, not only can the slats be tilted via remote control, they can also be completely retracted and extended. This gives your guests a view of the starry sky on balmy summer nights – the feeling of being in a convertible at the press of a button.

Max. shading area

Individual unit: **28.75 m<sup>2</sup>**

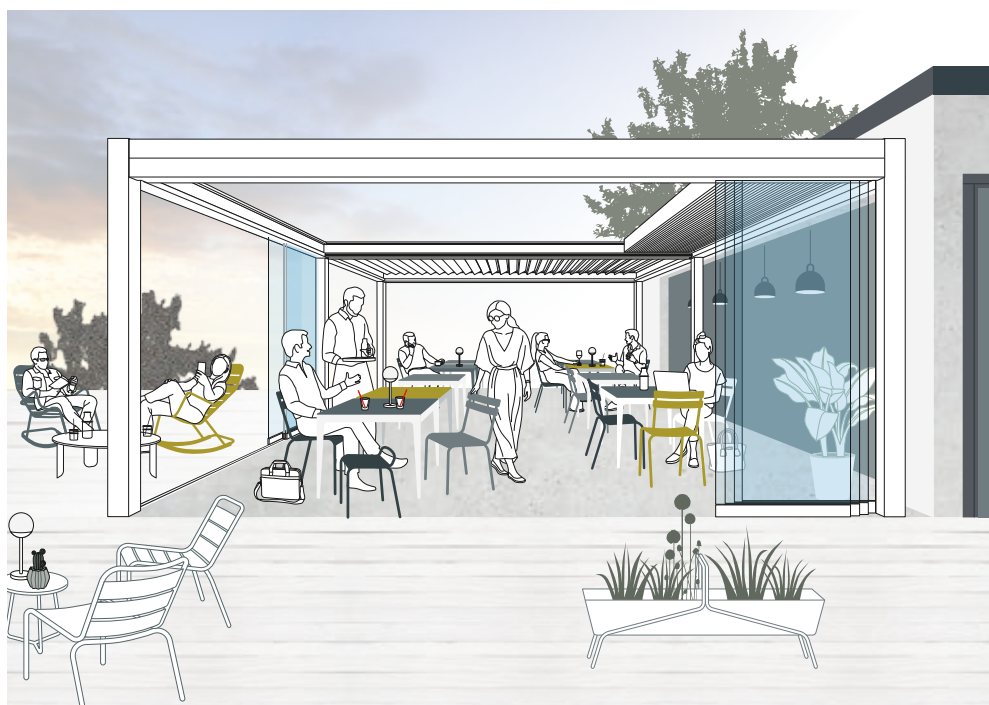

Series-mounted unit: **54.00 m<sup>2</sup>**

Individual unit maximum dimensions

Length: **6.33 m**

Width: **4.75 m**

## Installation options

- > Individual units or series-mounted units
- > Wall or free-standing installation
- > Integrated into the existing roof construction without poles (L70 Free)
- > Combinable with L60

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Dimmable ambient lighting with LED strips in the horizontal or vertical area, direct and/or indirect as a coloured RGB variant
- > Integrated awnings with easyZIP guidance for additional shading and wind protection
- > Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- > Offset or additional pole
- > WAREMA Design radiant heater
- > Power socket

## Advantages

- + The unique convertible-like feeling creates a special ambience, and movable slats create an open-air atmosphere at the press of a button
- + Pleasant air circulation with slightly open slats
- + Unique dining ambience thanks to high-grade, exclusive design and many equipment extras
- + Extended season for outdoor dining thanks to year-round use
- + Reliable weather protection when slats are closed
- + Perfect lateral sun and wind protection thanks to being able to combine the integrated awning with the glass sliding system
- + WAREMA Colour collection for perfect matching with your dining environment

# Highly elegant

## Lamaxa L60

Show your guests the most beautiful form of outdoor dining: with the slat roof Lamaxa L60. Make every moment outdoors a special experience of heightened hospitality. The roofing can be free-standing, joined to the building wall or entirely without poles and pivotable aluminium slats offers your guests sun shading and rain protection nearly all year round. The incidence of light can be precisely regulated with the pivotable slats – all the way through to a complete closing of the slat roof for protection from the weather.

Max. shading area

Individual unit: **28.75 m<sup>2</sup>**

Series-mounted unit: **54.00 m<sup>2</sup>**

Individual unit maximum dimensions

Length: **6.33 m**

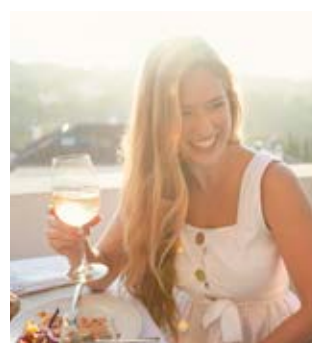

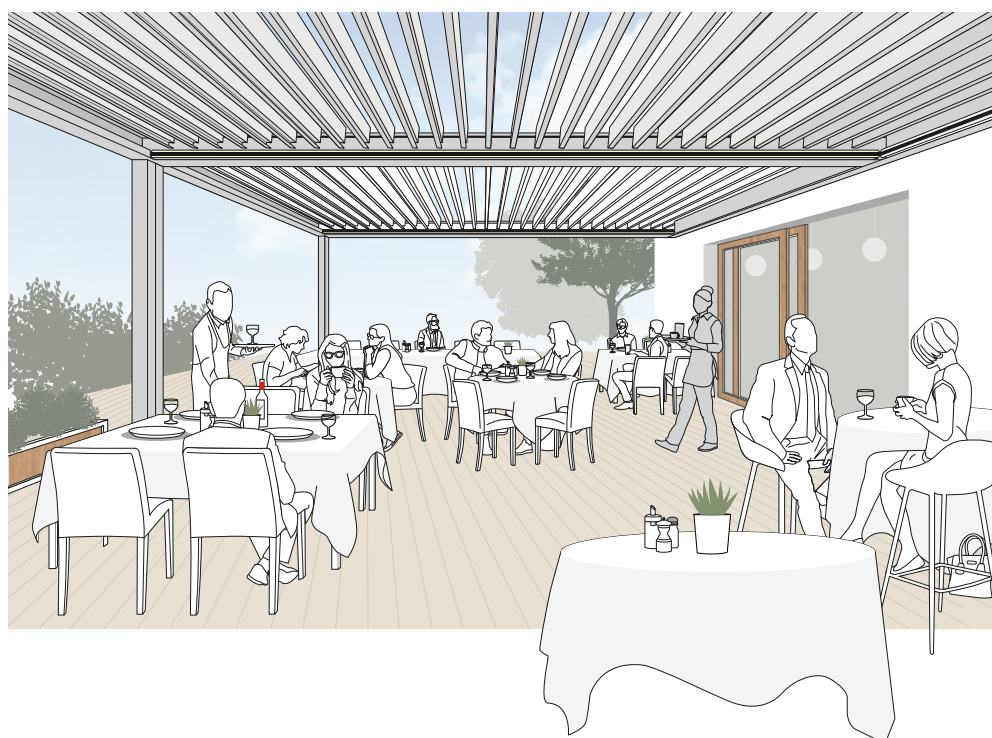

Width: **4.75 m**

GERMAN  
DESIGN  
AWARD

reddot winner 2021

## Installation options

- > Individual units or series-mounted units
- > Wall or free-standing installation
- > Integrated into the existing roof construction without poles (L60 Free)
- > Can be integrated into the on-site architecture

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Dimmable ambient lighting with LED strips in the horizontal or vertical area, direct and/or indirect as a coloured RGB variant
- > Integrated awnings with easyZIP guidance for additional shading and wind protection
- > Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- > Offset or additional pole
- > WAREMA Design radiant heater
- > Power socket

## Advantages

- + High-grade, exclusive, cubic design
- + Attraction for guests thanks to special eye-catcher and inviting ambience
- + Combination variant of integrated awning and glass sliding system enables perfect lateral sun and wind protection
- + Extended season for outdoor dining thanks to year-round use
- + Very high stability in wind and snow load thanks to the solid frame construction and the double-walled aluminium slats
- + Perfect adjustment to your dining environment thanks to a wide range of customisation options
- + Pleasant air circulation with slightly open slats

# The modular, flexible solution

## Lamaxa L50 slat

The slat roof Lamaxa L50 is an especially slender and customisable roofing choice for your outdoor area consisting of pivotable slats. This lets you offer your guests year-round sun shading and weather protection. With this roof system, you create a wind-stable guest area – even in bad weather. The incidence of light can be precisely regulated with the pivotable slats, even completely closing the slat roof.

Max. shading area per individual unit

**27.00 m<sup>2</sup>**

- > Total span of sail up to 13 m

## Equipment extras

- > Simple operation with a smartphone, hand-held transmitter or fully-automatic using a weather station
- > Manual height adjustment
- > Design poles from stainless steel

## Advantages

- + Fabric shapes can be perfectly matched to the outdoor area
- + Large area shading possible through several overlapping sails
- + Maximum 360° panorama with unlimited view out
- + Manually regulated height adjustment protects guests from low sun
- + Slender structure enables maximum and flexible seating
- + Built-in technology cushions gusts and ensures stability even in windy conditions
- + Wide choice of colours allows sun sail Sonea S70 to blend into the overall ambience perfectly

Patio frame with Terrea K60

With the best recommendations.

## Patio awnings Terrea

# First-rate design

## Terrea K60 and K70

Versatile, functional, inspiring: these compact cassette awnings offer everything that makes for a reliable sun shading system for your outdoor dining.

The cassette of both versions protects both the fabric and the articulated arms from wind and weather. The oval cassette of the Terrea K60 blends stylishly into any facade. The modern rectangular shape of the Terrea K70 cassette is an absolute eye-catcher that stands out from conventional awnings.

This creates an inviting feel-good atmosphere at your outdoor area.

Max. shading area per individual unit

**K60: 28 m<sup>2</sup> / K70: 24.5 m<sup>2</sup>**

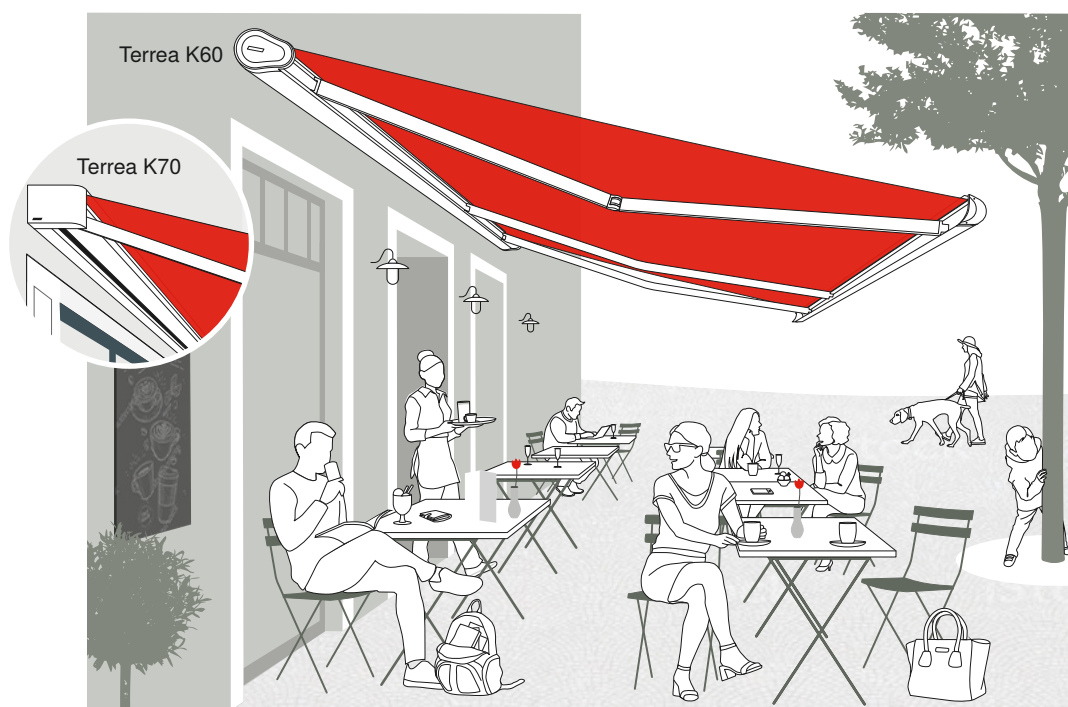

Individual unit maximum dimensions

Width: **7.00 m**

Projection: **4.00 m**

- + Available in over 200 frame colours and over 120 fabric designs
- + Eye-catcher thanks to freely selectable shape and colour design
- + High wind stability due to solid 120 mm pole and reinforced power struts

WAREMA sun shading solutions

## The features make all the difference

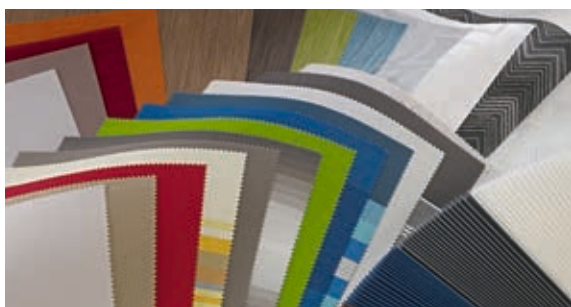

### Experience exclusive WAREMA Colour Worlds

You can order the aluminium parts of your sun shading products in more than 200 trendy colours from the WAREMA Colour World and Caravita, depending on the model.

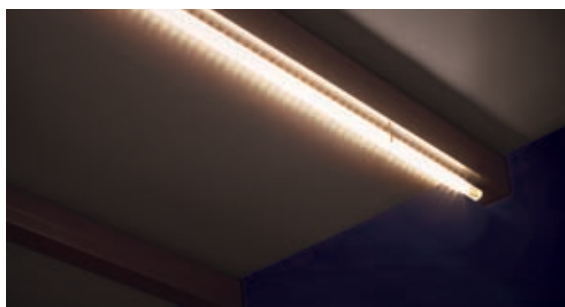

### Feel-good atmosphere with the radiant heater elements

So your guests can still use your outdoor area in the evening when temperatures drop: The WAREMA radiant heater in various designs extends the time outdoors.

### The large fabric collections

For all fabric elements, you get a huge selection of weather-resistant or even weather-proof and rainproof acrylic fabrics.

### Dimmable LED lighting

The permanently installed sun shading products can be equipped with LED strips or LED strip light rails. Both variants can be individually adjusted with the dimmer. From bright light to atmospheric ambience lighting, all lighting variations for long, cosy evenings in your outdoor area are possible.

### Printable/customisable

Customise your sun shading system with your design or logo. Our prints are highly resistant to UV rays and light-fast, and so sun, wind and weather can do little harm. Make your weather protection your visible "salesman" among the competition.

### Always on the safe side

WAREMA offers useful services, both for product selection as well as during your purchase and beyond. We will be happy to support you throughout the entire life of your sun shading system and even beyond. This means we can guarantee you many years of happiness with your top class sun shading product.

WAREMA sun shading solutions

## Features for awnings and parasols

### Patio side screen

Protect your guests from the sun, wind, weather and curious glances from passers-by, even from the side. Fabrics in straight or sloped versions and in many designs are the perfect match for your outdoor area.

### The optional valance roller blind

The valance roller blind for Terrea patio and Perea pergola awnings provides protection for your guests against low-lying sun or prying eyes from outside. Depending on your requirements, the valance roller blind can be operated by crank or conveniently with a hand-held transmitter.

### Vertical shading

This solution perfectly matches your pergola awning Perea in terms of design: vertical shading using front-mounted awnings with easyZIP guidance. In the event of emerging wind, up to three sides can be closed using the radio system. This creates a weather-independent room with all-round protection for your guests. The fabrics used are robust and the construction is extremely wind-stable.

### Multicube set

The Multicube set consists of four gabions which stabilise the poles of your shading system, replacing a concrete foundation. Furthermore, you create additional attractive seating or storage areas for your outdoor area. And thanks to a lifting device, your parasol can be conveniently positioned using a lift truck.

WAREMA sun shading solutions

## Features for Lamaxa roof systems

### High-grade glass sliding system

Lateral glass sliding systems (e.g. the sliding system SL 20e from Solarlux) offer additional transparent protection against wind and cold weather.

### Integrated external plug socket in the pole

To ensure that you have everything you need with your sun shading system, it can be equipped with an external power socket on request which includes a weather protection hinged lid. Whether outdoor kitchen, electric grill or laptop connection, you and your guests are always supplied with electricity.

### Elegant wooden and aluminium sliding shutters

Wooden (larch) or aluminium lateral sliding shutters with slats create elegant design accents. The aluminium shutters can be coated to match the frame or in a contrasting colour (conforms to CE).

### LED strips in the slat and on all sides

The LED lighting, integrated in the slats (L50) or attached as all-round lighting on the crossbeams creates a special mood at dusk. The all-round lighting is also available as multicolour ambient lighting (RGB).

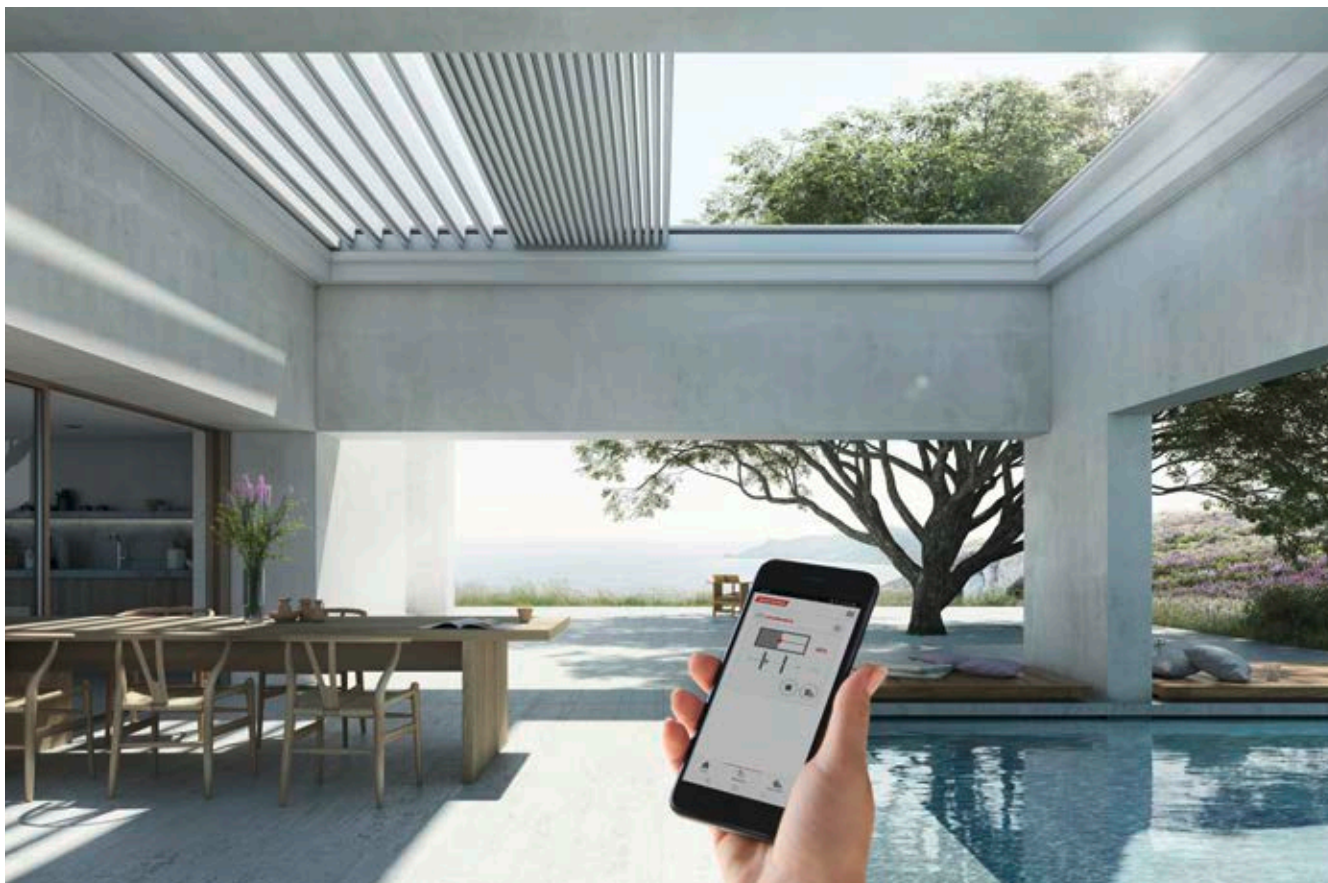

### Integrated awnings with easyZIP guidance

Awnings with easyZIP guidance combine modern design with functional safety for a pleasant climate with visual privacy and glare control. The intelligent lateral guidance guarantees exceptional stability and a firm hold even in strong winds. In the Lamaxa L60 and L70, it is fully integrated and almost invisible when retracted.

### Protection profile (L50)

The aluminium profile and the construction stand out thanks to the optimal weather protection and even keep out heavy rainfall and splash water. In addition, there is a stylish closure between the crossbeam and the slat.

Your weather protection at the press of a button

## Smart control for your outdoor dining

### Smart Home for your outdoor area

Operate your equipment, such as sun shading system, lamps/ lights, heating and more via just one app with WMS and homee – even by voice control. With homee, you can network your business completely according to your personal needs and easily integrate existing WMS products.

More information at [www.warema.com/en/homee](http://www.warema.com/en/homee)

**With the WAREMA Smart Living packages, you can control your outdoor living products – as smartly as you want.**

Our sun sails Sonea, Lamaxa roof systems and Terrea and Perea awnings are now available with the Smart Living packages **control** and **connect**. The choice is yours:

### WAREMA Smart Living **control** package

Conveniently control your sun shading products via hand-held transmitter with the Smart Living **control** package. Thanks to the sun control and the wind and precipitation monitoring, your guests can enjoy the greatest comfort and safety in any weather.

### WAREMA Smart Living **connect** package

Inspiration for your outdoor area

## Outside is the new inside

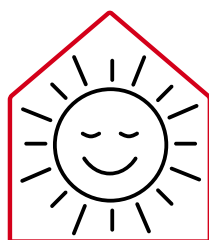

Delight your guests with your individual outdoor dining. Set new accents that visibly differentiate you from the competition. WAREMA offers you numerous inspirations for your new dining ideas and concepts.

Whether lighting, furniture, planting, radiant heaters, flooring or personalisation – talk to us about your project and benefit from our holistic experience.

Only available from us - the WAREMA service features

## All-round service à la carte

Premium Service

### Projection, planning and advice right from the start

Complex, large-scale dining roofs require maximum planning and solution expertise. Our interdisciplinary planning team of catering specialists and application engineers is there to provide you with full support right from the start. WAREMA's broad product range leaves nothing to be desired and ensures a perfect roofing solution according to your personal wishes and requirements.

Our qualified specialised retailers will be happy to assist you with on-site planning.

### Amortisation tool

Professional weather protection as an investment for the future – an investment that pays off!

Our catering and finance experts evaluate your roofing concepts with economy in mind and show you opportunities and potentials for different roofing options – the analysis serves as an important basis for the design of your dining patio.

---

## Visualisation

Make your own picture. Upon request, WAREMA offers you the opportunity to assess what your roofing concept will look like later on, in cooperation with your specialist partner, even during the planning phase. A photo-realistic 3D representation of the roofing situation is projected into your usual dining environment.

## Fabric printing

The outdoor patio is an eye-catcher for your guests. Design it according to your wishes. We offer versatile options for the individual design of your outdoor roofing. Thanks to the WAREMA Colour World, you have countless design variants at your disposal. In addition, WAREMA fabric printing allows maximum design freedom - whether advertising, logos or creative ideas.

## Individual control

Requirements in the food service industry are especially multi-faceted. WAREMA's automatic control system is perfectly tailored to your wishes and needs.

---

## Installation and commissioning

Well-organised installation and commissioning is worth hard cash for your catering business. Our qualified specialised retailer will be happy to support you. WAREMA offers you delivery directly to the site if required. Your commissioning package will help you with questions about the product and its operation.

---

## Cleaning set

As a leading manufacturer of sun shading systems, WAREMA knows what's important for cleaning. That's why you'll achieve optimum results with our aids. The tested and certified WAREMA cleaning set is suitable for efficient cleaning of your sun shading products.

---

## Maintenance package

Regular maintenance of your dining roofing counteracts costly breakdowns, enables maximum service life of your enclosure solution and ensures carefree use even under the heaviest use. In addition, the WAREMA Service Hotline is available to you free of charge with the maintenance package. This is how we, together with the WAREMA specialised retailer, guarantee the fastest possible and simplest solution in the event of damage.

## Fabric replacement

Even if you want to replace your awning fabric at some point, WAREMA is the right place for you. Here you will find a wide range of high-grade awning fabrics in various different qualities and designs. Your WAREMA specialised retailer will organise the replacement of your old awning fabric with a new awning fabric.

The most important steps to your sun and weather protection

## The process step by step

### Planning

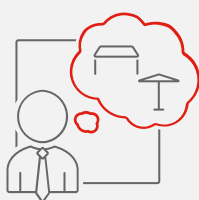

1

#### Establishment of initial contact

Contact the WAREMA specialist retailer in your region or speak to us directly.

Find your specialised retailer here:  
[www.warema.de/fachhaendlersuche](http://www.warema.de/fachhaendlersuche)  
 Or contact us at:  
[gastronomie@warema.de](mailto:gastronomie@warema.de)

2

#### Pre-planning

During an initial on-site appointment, your needs will be discussed and the best weather protection for you explained.

3

#### Design planning

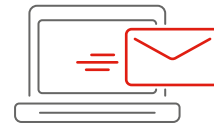

Armed with this knowledge, we create technical drawings and visualisations on request so that you can get a precise idea of your sun shading solution in advance.

4

#### Implementation planning

We present the planning to you on site. Any modifications will be adapted in the technical drawings according to your wishes. You will then receive a rough cost estimate for your project.

**Do you have questions?  
Please send us a message:**  
[gastronomie@warema.de](mailto:gastronomie@warema.de)

## Version

## Project completion

**5**

### Quotation

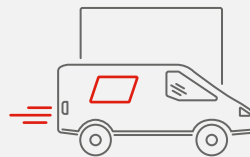

Your WAREMA specialist retailer will now prepare a concrete offer based on the final implementation planning.

**6**

### Awarding of contract

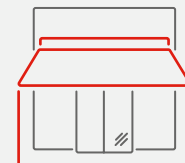

After your approval, your specialist WAREMA specialised retailer will be commissioned.

**7**

### Version

Responsible for the logistics processes and the implementation of the order and ensures the professional and timely installation of your weather protection on site.

**8**

### Project completion

The handover/ acceptance of the construction project takes place.

On request, we guarantee a carefree service life with the WAREMA maintenance package.
